Our Pre-K Three program focus is phonics and number concepts. Computers, Spanish, Sign Language, Science, Drama and Music are incorporated into the lesson plans to create a fun and hands on learning process. Children are exposed to new learning opportunities everyday thanks to Miss and Lori and Joanne's in creative and challenging lesson plans.

For example when your child is learning the phonetic concept of L they may study the ladybug life cycle, learn the sign for Ladybugs, read books about ladybugs, create a puppet show, count ladybugs, sing songs and color a pictures about ladybugs. We will observe our lady bugs in the garden that our preschoolers tend. They are learning the "L" sound through discovery and not rote.

Our teachers, Miss Lori and Miss Joanne are extremely talented and experienced teachers. Miss Lori has been teaching for more than 10 years and has completed her Child Development Associates. Miss Joanne has her Bachelor's degree in Education, State of Florida Teaching certification and has experience in VPK, PRE-K and elementary classrooms.
